

# Protocol

## Library

Variables &  
functions

## Inputs

Default values given

Imports from  
protocol libraries

## Nested simulation loop(s)

*Model*

Outputs are n-dimensional arrays

Interface definition

## Model

Has inputs and outputs  
(n-d arrays with units)

One-step simulation primitive

## Post-processing

Functional language extending MathML

## Outputs

N-d arrays (with units)

Plots
